

AI AlgoVision — Quick Installation Guide

Get your AI-powered trading engine running in 4 simple steps.

Step 1: Download

File	Description
AI AlgoVision.exe	Signal API Backend Server
AI AlgoVision by TimeSyncTrading.ex5	MT5 Expert Advisor

Download both files from: <https://www.timesynctrading.com/>

Step 2: MetaTrader 5 Setup

Allow the EA to communicate with the AI backend via WebRequest.

1. Open **MetaTrader 5**
2. Go to **Tools** → **Options** → **Expert Advisors**
3. Check **Allow WebRequest for listed URL:**
4. Click **Add** and enter these URLs one by one:

```
https://ai.timesynctrading.com
http://127.0.0.1:8080
http://127.0.0.1:9111
```

1. Click **OK** to save.

Step 3: Dashboard Setup

3.1 Start the Backend Server

- Run AI AlgoVision.exe

- The server starts locally on your machine.

3.2 Open the Dashboard

- Open your browser
- Navigate to: **http://127.0.0.1:9110**

3.3 Connect Your AI API Key

1. Go to **Google AI Studio**: <https://aistudio.google.com/api-keys>
 2. Click **Get API Key → Create New API Key**
 3. Copy the generated API key
 4. Return to the **AI AlgoVision dashboard**
 - ✓ 5. Paste your API Key into the input field
 6. Click **Save**
-

Step 4: Attach EA to Chart

1. In MetaTrader 5, open the **Navigator** panel (left side)
 2. Find **AI AlgoVision by TimeSyncTrading** under Expert Advisors
 3. **Drag** the EA onto your desired chart (e.g., XAUUSD M1)
 4. In the settings popup:
 5. Check **Allow Live Trading**
 6. Check **Allow DLL Imports** (if requested)
 - ✓ 7. Click **OK**
 8. Click the **AutoTrading** button in the top toolbar until it turns **GREEN**
-

Verification Checklist

Before you start live trading, confirm:

- [] EA status shows **Connected / Running**
- [] Dashboard shows **AI engine online**
- [] Dashboard shows **receiving chart data**
- [] AutoTrading button is **GREEN**

If all checks pass — your AI trading engine is ready!

Troubleshooting

Issue	Solution
EA shows "Disconnected"	Check if <code>AI AlgoVision.exe</code> is running
Dashboard won't load	Verify <code>http://127.0.0.1:9110</code> is accessible
"WebRequest failed" error	Re-check Step 2 — URLs must be added exactly
"Invalid API Key"	Re-copy key from Google AI Studio (no extra spaces)
EA not opening trades	Ensure AutoTrading is GREEN
